

Vicente A. Barrios

Objective

To obtain a challenging position with your company where my experience, training, and education can be used to its fullest extent; where my team concept skills will benefit both your business and myself.

Experience

1999–2009 Emerson Valparaiso, IN

Systems Administrator / Technical Specialist

- Assisted in the migration of several thousand user Novell to a Windows NT Network. Instrumental in the migration to Active Directory.
- Directed and assisted in WAN & LAN system upgrades. Including hardware and software upgrades for both servers and clients.
- Trained technical support personnel and end users in all technical facets of the job, and also provided technical support and training for international sites and their support personnel.
- Provided technical support for both Microsoft servers and clients.

1998–1999 Xerox Connect Cincinnati, OH

Internet Systems Consultant / LAN Administrator

- Administrated a large Novell Network, including many Windows NT Servers, and a Mainframe. Created new user network accounts, with Email and Internet access. Directed upgrades for user accounts, adjusting networking rights and access to highly sensitive data as needed.
- Worked in solving many day-to-day computer related problems with both servers and clients.

1998 Intellicom Hammond, IN

Helpdesk/Consultant

- Supervised a Helpdesk in a fast growing multi-location office with over 300 users including an offsite sales force.
- Instructed, and personally helped users with all aspects of computing, including Windows Operating Systems, Microsoft Office Suites, graphic solutions, networking, Internet access, printing, and Email.
- Installed both hardware and software.

1994–1997 BDT Technologies Griffith, IN

Owner/Computer Consultant

- Worked to set high expectations and integrity in computing standards within the small business community. Procured other corporate clients that required the uppermost in professional and business relationship principles.

1990–1994 Imaginations Graphic Services Merrillville, IN

Owner/Publisher

- Developed a fast paced business — setting industry standards for quality and pricing. Acquired many high-profile clients, which required elevated standards in professional and business relationships.
- Hired, trained, and managed technical and artistic personnel including a sales team, in a multi-location office.
- Worked with design and marketing deadlines in multimedia and print publishing.
- Consulted clients in implementing business computer systems and marketing concepts on the Internet with full technical support in both.

1976–1990 Inland Steel Company East Chicago, IN

Technical Supervisor

- Managed 15 multi-skilled employees in a highly competitive industrial setting. Entrusted with final product inspection and shipping.
- Scheduled and coordinated the transport of finished products for local, national, and international deliveries.
- Managed 250 regular full-time employees when necessary. Including contractual workers, in day-to-day operations.
- Maintained SPC records and other highly valued quality control programs.
- Conducted time studies and formulated incentive rates for special projects.
- Developed new dyes and molds for product manufacturing and also used CAD programming to refine working schematics and drawings.
- Received Special Achievement Award for record-breaking production.
- Developed Excellence in Team skills.

Education
